IBM Blockchain Platform on IBM Cloud

Except as noted below, the terms of the IBM Cloud Service Description apply.

1. Cloud Service

The IBM Blockchain Platform on IBM Cloud provides a blockchain platform based upon the Hyperledger Fabric. Hyperledger Fabric is an open source and openly governed blockchain provided by The Linux Foundation. Blockchain is a shared, distributed ledger technology for a new generation of transactional applications that establishes trust, accountability and transparency while streamlining business processes. The IBM Blockchain Platform on IBM Cloud provides the ability to develop applications, and to govern and operate a blockchain network in the IBM Cloud.

1.1 Offerings

The Client may select from the following available offerings.

1.1.1 IBM Blockchain Platform on IBM Cloud

With the IBM Blockchain Platform on IBM Cloud service users can:

- Create a blockchain network
- Govern the business network across multiple organizations
- Manage and monitor the business network

2. Data Processing and Protection Data Sheets

The Data Sheet applicable for this service and the terms of this section provides the details and terms, including Client responsibilities, around use of this service. The following Data Sheet(s) apply to this service:

https://www.ibm.com/software/reports/compatibility/clarity-reports/report/html/softwareReqsForProduct?deliverableId=9F8A5540C79011E6A98AAE81A233E762

3. Service Levels and Technical Support

3.1 Service Level Agreement

The service level agreement set forth in the base IBM Cloud Service Description applies to this service.

3.2 Technical Support

The support terms set forth in the base IBM Cloud Service Description apply to this service.
